Product Highlights:

The Kodiak Sports KS24PVAL and KS36PVBM turf products are made with a new type of outdoor yarn; each leaf on the grass is now a 500 denier; which is 20 times thicker and larger than the typical yarns used in regular indoor/outdoor athletic turfs.

The monofilament yarn gives the following advantages: improved ball roll, better foot traction, no pile direction and will last longer in high use areas. The new "spring set" yarn always looks new and fresh.
